SOFTWARE DEVELOPMENT PROFESSIONAL

COMPLEX SOFTWARE SYSTEMS | DATA ANALYTICS | SOFTWARE DEVELOPMENT | WEB APPLICATION DEVELOPMENT

Creative and multi-faceted software engineer with over 3 years of broad-based experience in software, focusing on using and utilising PHP, GO, C and Java. Imaginative professional with the ability to demonstrate advanced and diverse technical skills – capable of developing new technologies and building complex software systems using Spryker Framework and Symfony among others. Collaborative team player with extensive knowledge in communicating with users, other technical teams, and management to collect requirements and describe software product features, technical designs, and product strategy to ensure satisfactory accomplishment of tasks and effective formulation of plans. Equipped with significant experience in an engineering environment, highly-interested in achieving and driving operational excellence and best practices.

CORE COMPETENCIES

- Database Design
- Coding Standards & Code Reviews
- Programming Languages
- Source Control Management
- Structural Data
- Spryker Framework
- Technical Designs & Product Strategy
- Strategic Analysis & Tactical Planning
- Data Reporting & Automation
- Application Development
- Software Development
- Symfony Framework
- Compliance & Process Improvement
- Software Architecture
- Dashboard & Database Creation
- Web Development
- Front-End & Back-End Development
- Pact & Behat Testing

EDUCATION

SOFTWARE DESIGN AND ARCHITECTURE – *University of Alberta*

September 2021

RELEVANT COURSES

COMPUTER SCIENCE FOR WEB PROGRAMMING, SOFTWARE ENGINEERING – *HarvardX*

June 2021

Topics: Algorithms, Data Structures, Memory, Pointers, Dynamic Memory Allocation, Call Stacks, C Programming, Django and React Frameworks for Web Development, Testing, CI/CD, Scalability and Security in Web Applications.

FULL-STACK DEVELOPER – *Upgrade Hub*

January 2020

Topics: Intensive Boot camp – Enhanced coding and web layout skills, Proper utilisation of HTML semantic elements, Bootstrap and SCSS for the web layout, (Back-End) learned how to code using PHP, Node.js (ExpressJS), and frameworks like Symfony. Code using JavaScript(ES6), Angular and React, Relational Databases (MySQL), Document-Oriented Databases (MongoDB), and Utilization of Docker for Containerised applications.

COMPUTER PROGRAMMING – *Web Programming*

Topics: Java, PHP, Relational and Non-Relational Databases, Project Management

TECHNICAL SKILLS

PHP, GO, C, SQL, Linux, MongoDB, Git, MySQL, Elasticsearch, Jenkins, Spryker Framework, Symfony Framework, API, Kubernetes, gRPC, Akeneo, Apache Kafka, Pact & Behat Testing, Docker, Data Structures, Git, Coding Standards & Code Reviews, Microservices

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER – *Atida, Amsterdam, North Holland*

February 2021 –

Present

- Worked with frameworks such as Spryker, Symfony, and used technologies like Apache Kafka, Algolia/Elasticsearch, Akeneo, gRPC, and Kubernetes.
- Demonstrated exceptional skills and expertise in performing Agile Software Development for a global e-commerce platform.
- Cross-Collaborated with diverse IT professionals from all over the world to form a team that exhibits excellence in development.
- Applied SOLID principles, design patterns, distributed architecture, RESTful architecture, and Apache Kafka to connect microservices.
- Provided a strong focus on managing the hardware and software support system to ensure smooth, trouble-free operations.
- Supported the Integration with the DevOps team to improve Software/Hardware monitoring, and troubleshooting.
- Developed and scripted internal tools and proficiently led the offshore development team to improve established processes.

Present

- Developed custom eCommerce solutions using well-known frameworks such as Spryker, Symfony, and Silius.
- Meticulously detected and reported issues to be removed within the system before deployment to ensure smooth functionality.
- Showcased competency by analysing current systems and proposing solutions for anomalies to develop efficiency and drive growth.
- Responded to requests for technical assistance in person and via phone/email and took full responsibility for critical systems.
- Spearheaded the customisation and addition of new features to commercial software packages and internally developed applications.
- Led development based on best practices throughout the organisation while governing control and ensuring achievement of objectives.
- Streamlined the database changes and management of administration tasks on web portal servers to secure accurate data.

BACK-END DEVELOPER – *Flat 101, Madrid, Spain***August 2020 – February****2021**

- Fully responsible for building efficient back-end systems as well as identifying ways to improve and diagnose back-end errors.
- Showcased exemplary talent and knowledge in developing e-commerce solutions by utilising effective and agile methodologies.
- Proven excellent aptitude in integrating dynamic solutions using technologies like Symfony, Silius, Jenkins, Docker, and AWS.
- Exhibited outstanding aptitude in back-end development by expertly performing UI tests to ensure optimised system performance.
- Engaged in all aspects of release cycles, including requirement review, work estimation, design, implementation, and testing process.
- Liaised with fellow developers, designers, and system administrators to create and identify new features for modern tech development.

LICENSES & CERTIFICATIONS**SPRYKER DEVELOPER FOUNDATIONS CERTIFICATION – *Spryker Academy*****November 2022***ID number: 28928078***SOFTWARE DESIGN AND ARCHITECTURE – *University of Alberta (Coursera)*****September 2021***ID number: X7BVT6QKRLYH***COMPUTER SCIENCE FOR WEB PROGRAMMING – *HarvardX*****July 2021***ID number: ab44191beaf042f29529d1b3d072b0eb***WEB FULL STACK DEVELOPER – *Upgrade Hub*****July 2021***ID number: 21035913***CERTIFICATE IN ADVANCED ENGLISH (CAE) – *Cambridge University Press & Assessment English*****July 2018**
